February 24-26, 2014
Orange County Convention Center
Orlando, Florida**

**ADVANCED TECHNOLOGY GROUP PRESENTS HD MEDICAL DEMONSTRATING
VISCOPE VISUAL STETHOSCOPE AT HIMSS 14**

- New Stethoscope Enables Visualization Creating a Superior Clinical Diagnostic Environment -

Orlando, FL – February 19, 2014 – At the upcoming HiMSS 14, the [AT Group](#) exhibit, Booth #7384, presents HD Medical Inc. demonstrating its new visual stethoscope, ViScope™. This new stethoscope offers a unique integrated visual display that lets medical professionals perform dynamic auscultation™ and “see” the heart sounds they hear in real-time visual waveforms. The ViScope visual display is complemented by high fidelity sound quality and amplification up to 30 times louder than a traditional scope for unmatched clarity. HD Medical has invested over a decade refining its proprietary noise reduction technology.

ViScope records patient heart sounds for 10 seconds capturing the first heart sounds, often the most telling for healthcare professionals. The scope’s heart sound recordings can be transferred to a PC configured with the ViScope bundled software to access a tunable filter that provides the ability to select specific parts of the heart sound to listen to, such as S1/S2, S3/S4, etc. ViScope’s value as a screening tool for early detection of cardiac defects has been validated through multiple clinical trials.

“HD Medical’s visual stethoscopes are uniquely capable of addressing today’s evidence based medical environment,” states Muthu Krishnan, Senior Vice President of Business Development for HD Medical. “ViScope is the industry’s first stethoscope to enable documentation of heart data which can be used for patient reporting and analysis as well as information sharing or for use in teaching situations.”

-more-

ViScope has been awarded the US Food and Drug Administration (FDA) 510 (K) clearance and is undergoing certification for CE compliance. ViScope is sold from the [website](#) and through HD Medical's network of resellers in the USA.

About HD Medical, Inc.

HD Medical, Inc. is a medical device innovator based in California, USA with Corporate Offices in Sydney, Australia and Research Labs in Chennai, India. Since 2005 the company has designed and developed medical products for use in screening and early detection of cardiac conditions. Coming from a tradition of helping to promote personal and community health, through exceptional healthcare diagnostic products and solutions, HD Medical, Inc. is committed to delivering "Higher Dimensions in Healthcare".

The company markets its innovations to medical professionals, large medical institutions and channel partners through operations in the USA and Asia Pacific. HD Medical's patented technologies and products offer a paradigm shift in clinical diagnostics. Learn more at www.hdmedicalgroup.com.

About AT Group

Headquartered in Sunnyvale, CA, the Advanced Technology Group (AT Group) strives to create an environment to accomplish great goals through entrepreneurial spirit and creative genius with execution at the highest level. The company is purpose-driven with a mission to innovate, incubate and invest in Triple Bottom-line companies primarily in healthcare, internet and green technologies. TBL companies not only focus on profits but also people and planet. This TBL philosophy encompasses humanitarian and sustainability goals along with good economic performance.
